JOHN EMMANUEL T. SUANTE

> IT Student

I'm a second-year **Bachelor of Science in Information Technology (BSIT) student** from Malinao, Aklan, with a growing passion for technology, software development, and cybersecurity. I enjoy

designing and building web and mobile applications using **React, TypeScript, and Flutter**, while continuously expanding my technical skills through hands-on projects, experimentation, and problem-solving.

Beyond development, I'm actively exploring the field of **cybersecurity**, learning about web security, ethical hacking, and Capture The Flag (CTF) challenges. I also enjoy participating in hackathons and technology competitions across Western Visayas, where I challenge myself, collaborate with others, and turn new knowledge into practical experience.

I'm driven by curiosity, continuous learning, and the desire to build technology that makes a difference.

[01] ABOUT ME

From Malinao, building outward.

A student developer who likes knowing how systems work, and how they break.

I'm a 2nd-year BS Information Technology student majoring in Instructional System Technology, studying at Aklan State University – Kalibo.

I got into tech by building things: interfaces in React, mobile apps in Flutter, and a full-stack budgeting app for students like me. Competing pulled me toward security. Capture-the-flag rounds at HackForGov and DICT's ethical hacking mentoring showed me how much is at stake when software is careless with people's data.

My goal is a career in **cybersecurity**: building secure systems, and helping local governments and schools in the Visayas protect what they run.

COURSE **BS Information Technology**	MAJOR **Instructional System Technology**
YEAR **2nd Year**	HOMETOWN **Malinao, Aklan**

CURRENTLY LEARNING

- Web development with React & TypeScript — Building
- Ethical hacking & CTF problem solving — HackForGov
- Cross-platform apps with Flutter & Dart — Self-study
- Full-stack TypeScript with Next.js & Supabase — Finora

HOME BASE

Poblacion, Malinao, Aklan

11.6442° N, 122.3076° E · UTC+8

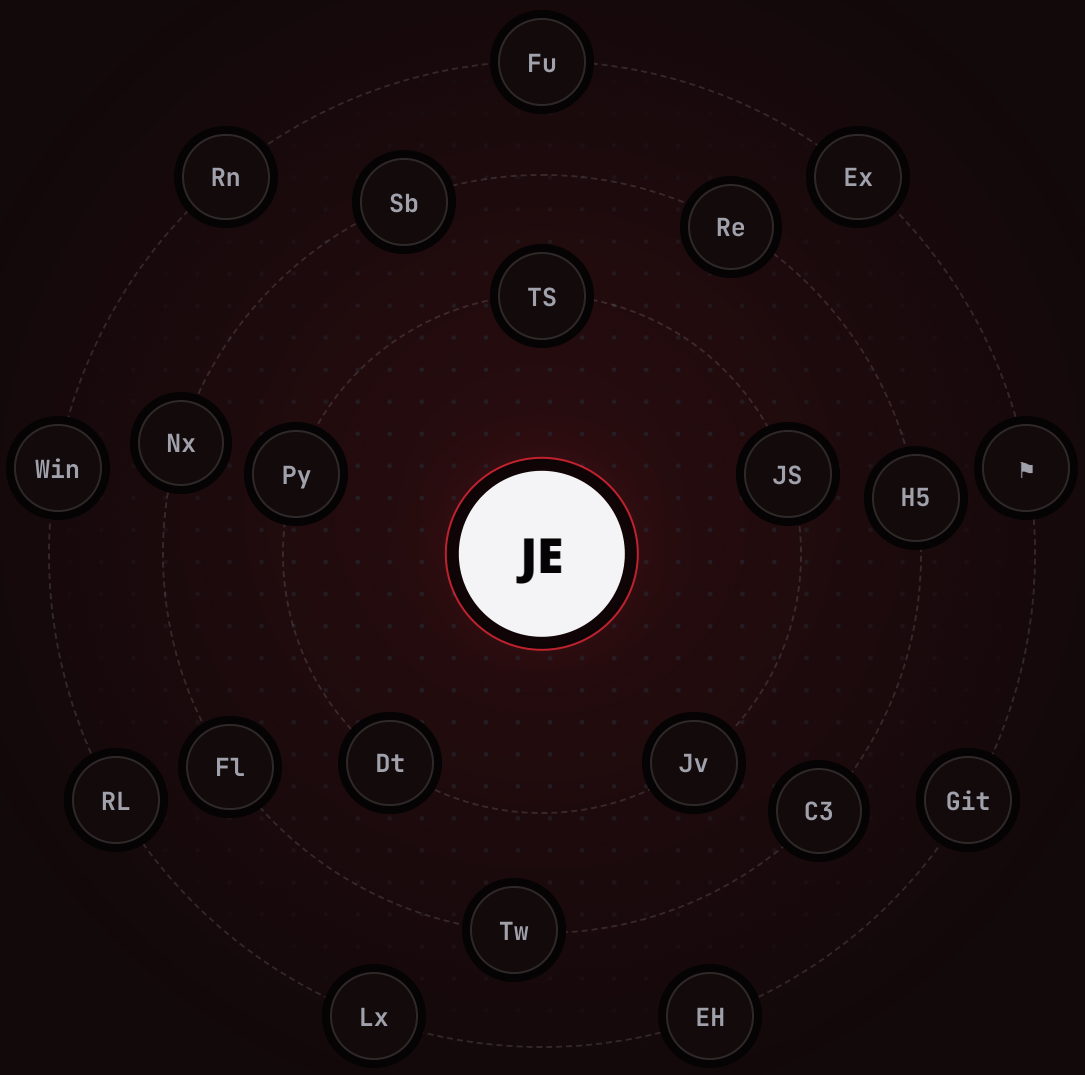

My hometown in northern Panay, about 10 km from campus.

LOCAL TIME 23:51:04 SUNRISE 05:46 25°C CLEAR 10 KM

[02] TECHNICAL SKILLS

The stack I work in.

Pick a category to light it up in the orbit. Hover a planet to pause the system, or click it to jump to its group.

All | Languages | Web | Mobile | Security | Tools

Programming Languages

What I write day to day and in coursework.

05

- TypeScript Finora
- JavaScript
- Java DataCamp ×2
- Dart
- Python

Web Development

Front-end interfaces and full-stack web apps.

07

- React
- HTML
- CSS
- Tailwind CSS
- Next.js Finora
- Supabase Finora
- Flask

Mobile

Cross-platform apps from one codebase.

03

- Flutter
- Dart
- Expo / React Native Finora

Cybersecurity

My focus area, practiced through CTFs and secure coding.

03

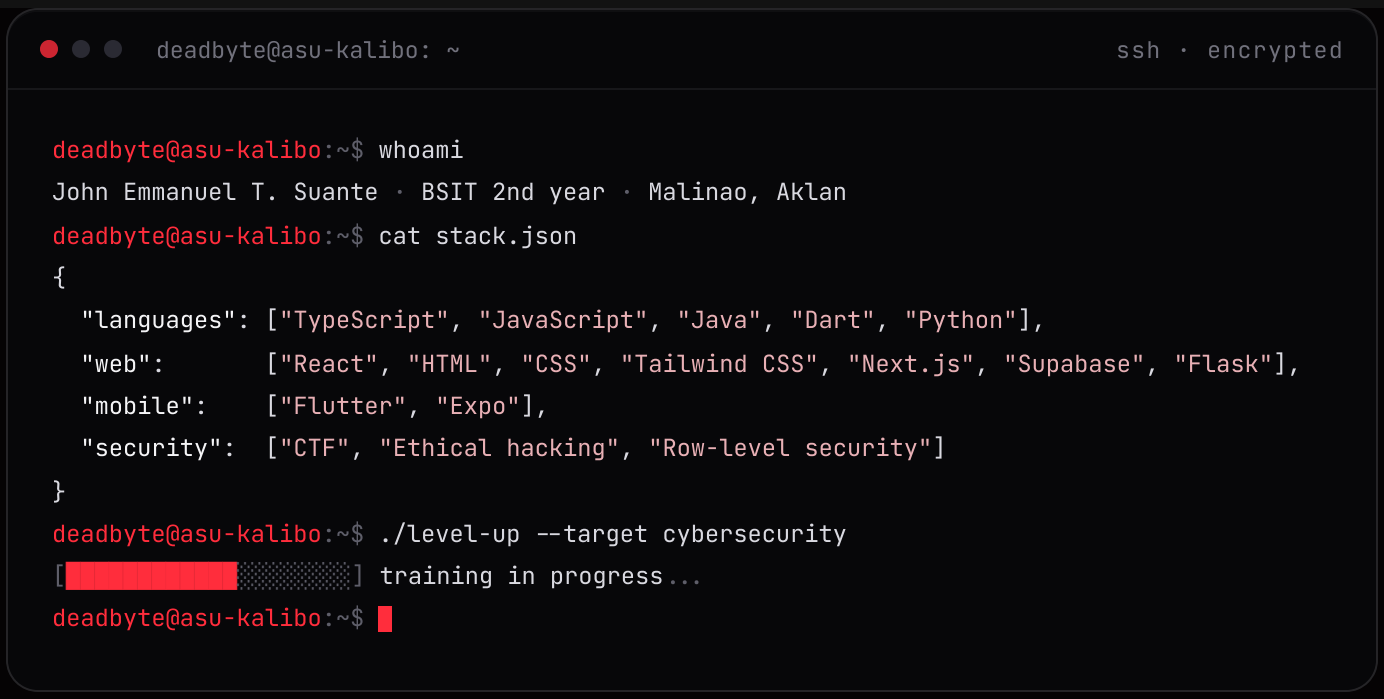

- CTF challenges HackForGov Top 5
- Ethical hacking DICT
- Row-level security Finora

Operating Systems & Tools

Where I build, test and ship.

04

- Windows
- Linux
- Git & GitHub
- Render

[03] PROJECTS

Things I've shipped.

A full-stack app of my own, plus team builds made under hackathon deadlines.

Web + mobile app | Solo project

Finora

A personal finance app for college students, on the web and on your phone: track your allowance across wallets, set budgets, and save toward goals. Both apps share one database and the same money logic, so an expense added on the phone shows up on the web dashboard right away. Retro pixel-art interface.

"Every Peso. Every Purpose."

- **Safe-to-spend** daily figure on the dashboard
- **Budgets** weekly or monthly, per category
- **Web & mobile** Next.js site and Expo app, one shared core
- **Wallets** cash, e-wallet and bank, with transfers
- **Savings goals** with the weekly pace needed
- **Security** Supabase Auth and row-level security

TypeScript | Next.js | Expo / React Native | Supabase | PostgreSQL | Tailwind CSS

Team build · Disaster risk

Tabang

Built with a five-member team from ASU Kalibo for KomsaiHack 2026: RiskReady, a hackathon on real-world risk challenges such as fire, storm surge, flooding and landslides. *Tabang* means "help" in Hiligaynon and Aklanon.

Startup pitch

Philippine Startup Challenge

Pitched a startup idea with the Developer's Guild at the DICT Philippine Startup Challenge regional pitching competition. The team took home medals and certificates of recognition.

DICT · ICT Industry Development Bureau

[04] CERTIFICATIONS & ACHIEVEMENTS

Proof of work.

Competitions 5 | Certificates 5

OCT 23, 2026 · SAMS21 HOTEL, ILOILO CITY

HackForGov 5 · Regional Qualifying Round

Team CyberGuild of the ASU Kalibo College of Computer Studies went from regional qualifier to a Top 5 finish in DICT and CERT-PH's government cybersecurity competition.

★ TOP 5 | Cybersecurity | Team CyberGuild

2026 · UP VISAYAS KOMSAI.ORG

KomsaiHack 2026: RiskReady

Competed as Team Tabang representing Aklan State University – Kalibo, building for real-world disaster and risk challenges. Recognized for innovation, teamwork and problem solving.

★ TOP 6 | Hackathon | Team Tabang

2026 · DICT · ICT INDUSTRY DEVELOPMENT BUREAU

Philippine Startup Challenge

Regional pitching competition under DICT's Innovative Startup Fest. Pitched with the Developer's Guild and received medals and certificates of recognition.

REGIONAL PITCHING | Startup

MAY 21–23, 2026 · CENTRAL PHILIPPINE UNIVERSITY, ILOILO CITY

Ready, Spark, Charge 2026: Hacking the Future of Energy

Three-day energy hackathon by New Energy Nexus Philippines with UMWAD Western Visayas, CPUGAD TBI and DOST Western Visayas iHubs.

PARTICIPANT | Clean energy

REGIONAL SCIENCE & TECHNOLOGY WEEK

Regional Science & Technology Week

Represented home as Team Malinaonon Musketeers and received a Certificate of Participation.
